**Thank you for taking the time to explore my work.**

This document was created with care, with close attention to both structure and content.

I invite you to read it slowly and thoughtfully.
Each section has a purpose, and together they're designed to give you a clear and honest picture of who I am and how I can contribute.

## About me

I am a web developer with **over 4 years of experience** and currently a student of Physics at UNED.

I bring a thoughtful, problem-solving approach to both technical work and collaboration. My background includes working with startups as well as larger companies, where I have developed not only my coding skills but also the ability to navigate team dynamics and maintain clear, respectful communication with clients.

While my career so far has been dynamic, I am now focused on building a more stable and meaningful future. I'm currently relocating to Australia, looking for a role and environment where I can contribute with confidence and help bring out the best in both myself and those around me.

## Education

| | | |
|---|---|---|
| • Physics degree | UNED | 2025 - Present |
| • B2 First Cambridge | Kelington Institute | 2024 - 2025 |
| • Intensive Training in Web and Mobile Development | Codenotch | 2020 - 2021 |
| • Web Development Program (UK on remote) | Student Finance | 2020 - 2020 |

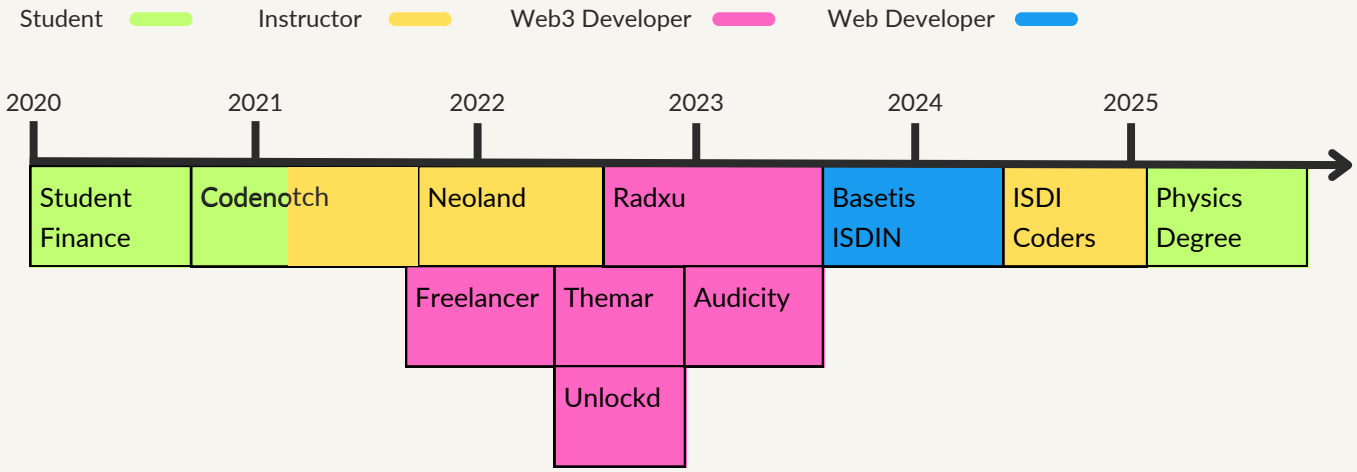
## Core Competencies

- **End-to-End Web Development:** skilled in building scalable applications using JavaScript, TypeScript, and frameworks such as React, Next.js, Angular, SvelteKit, Astro and Flutter. Backend experience includes Node.js, Express.js, Nest.js, with database integrations using PostgreSQL, MongoDB, and GraphQL APIs. Committed to maintainable code with testing practices using Jest, Mocha, Chai, and debugging tools.

- **UX, Tooling & Collaboration:** experienced in designing intuitive interfaces with Tailwind CSS, styled Components, and SASS. Strong collaboration practices using Git and Agile methodologies (Scrum, Kanban), alongside design tools like Figma and Canva. Experienced in using monitoring and analytics tools such as Sentry, Segment, Mixpanel, and browser DevTools.

- **Web3 & Infrastructure:** Proficient in developing decentralized applications with Solidity, Ethers.js, Web3.js, Viem, Hardhat, Foundry, and TheGraph. Familiar with infrastructure and tooling such as Docker, AWS, Truffle and CI/CD pipelines.

# Relevant activity timeline



# Experience

- **Main Teacher** at ISDI Coders Spain, Barcelona - full remote Jul 2024 - Jan 2025

As a Web Programming Instructor, I led small-group classes in full-stack development using the MERN stack delivered remotely. I designed customized learning materials, including study guides, hands-on exercises, and video tutorials, to support students in launching their careers as junior developers. My teaching approach emphasized practical learning, building technical confidence, and applying real-world development practices from day one.

- **Web Developer** at Basetis Spain, Barcelona - full remote Ago 2023 - May 2024

At ISDIN, I worked as part of a multidisciplinary team focused on the continuous development of a digital product in the health and skincare sector. My role involved identifying and resolving inconsistencies between internal services and third-party platform integrations, ensuring smooth and reliable system functionality. Operating within Agile and SCRUM methodologies, I supported effective cross-team collaboration and contributed to delivering a seamless user experience.

- **Web3 Developer** at Audicity United States, Wyoming - full remote Oct 2022 - Apr 2022

In a dynamic startup environment, I was one of two developers responsible for building multiple marketing websites and a blog using Sanity as the CMS, based on designs provided by external experts. We followed a flexible Kanban process that encouraged rapid iteration and close collaboration to deliver polished, user-friendly web experiences. My role included frontend development, technical code reviews, testing smart contracts, ensuring smooth backend integrations, and monitoring production environments.

- **UX Developer** at Radxu United States, Wyoming - full remote Jul 2022 - Jun 2023

I led the development and maintenance of https://app.radxu.org, a beta-stage Web3 platform built on the EVM-compatible Avalanche blockchain. The platform offers digital asset investment products and RADX token staking. Developed with a modern Web3 frontend stack based on the MERN architecture, the project demanded careful attention to UX design and ongoing technical refinement. I integrated Sentry for real-time error monitoring and focused on delivering a smooth, reliable user experience throughout the platform's early adoption phase.

- **Frontend Lead** at Unlockd Spain, Barcelona - full remote May 2022 - Oct 2022

As Frontend Development Lead for https://app.unlockd.finance/ and developer of the NFT incubator https://the-lockeys.unlockd.finance/, I was part of a young and agile 14-person team in a fast-moving startup environment. I led frontend architecture, organized Scrum sprints, created technical documentation, and streamlined collaboration between frontend, backend, and design teams. The dApp was built with a modern Web3 stack based on the MERN architecture and deployed on an EVM-compatible blockchain.

- **Frontend Lead** at Themar Solutions Andorra - full remote May 2022 - Oct 2022

I led technical interviews to identify and recruit skilled developers while collaborating closely with clients to understand and plan their platform requirements. I reviewed and ensured the quality of our programmers' work on client projects and maintained corporate marketing websites to keep them current and effective. My focus was on bridging client goals with development teams to deliver reliable, high-quality solutions.

- **Freelance Developer** Spain, Barcelona - full remote Oct 2021 - Mar 2022

I developed frontend features using React, Angular, and Ionic, while also handling backend tasks with Express. I created and maintained landing pages with WordPress and Webflow, and developed e-commerce websites on the Shopify platform. Additionally, I designed email templates for MailChimp using MJML and Maizzle to support marketing communications.

- **Technical Teacher** at Neoland Spain, Barcelona - hybrid Oct 2021 - Jul 2022
- **Technical Teacher** at Codenotch Spain, Madrid - hybrid May 2021 - Oct 2021

As a Web Programming Technical Support, I assisted small groups of students focusing on the MERN stack. I created supporting materials such as study guides and video tutorials designed to build student confidence and encourage real-world application of skills. My primary goal was to equip aspiring junior developers with the practical knowledge and experience needed to launch their careers.

I’m drawn to teams that build with purpose and intention.

If this document aligns with your vision, I trust the right connection will follow.
